

Create a New GitHub Repository

Step 1: Open GitHub

1. Sign in to your GitHub account.
2. Click the **New** button on the GitHub Dashboard.

Step 2: Enter Repository Details

1. In the **Repository name** field, enter: **MIET**
2. In the **Description** field, enter:

This repository is for practice and learning Git & GitHub.

1

General

Owner *

 hemanthbilla-official

Repository name *

MIET

✓ MIET is available.

Great repository names are short and memorable. How about [fantastic-octo-waffle?](#)

Description

This Repository is for practice

31 / 350 characters

Step 3: Configure Repository

1. Select **Public** visibility.
2. Keep **No template** selected.
3. Do not enable README, .gitignore, or License for now.

Step 4: Create Repository

1. Click the **Create repository** button.
2. GitHub will create an empty repository.

Expected Outcome

You should see a repository similar to:

<https://github.com/<your-username>/MIET>

2

Configuration

Choose visibility *

Choose who can see and commit to this repository

 Public ▾

Start with a template

Templates pre-configure your repository with files.

No template ▾

Add README

READMEs can be used as longer descriptions. [About READMEs](#)

Off ☐

Add .gitignore

.gitignore tells git which files not to track. [About ignoring files](#)

No .gitignore ▾

Add license

Licenses explain how others can use your code. [About licenses](#)

No license ▾
